SUMMARY

Software engineer who takes products from initial requirements through architecture, implementation, integrations, cloud deployment, app-store submission, and ongoing maintenance. Sole owner of a React Native application published on the App Store and Google Play with 30+ production releases since October 2025, and independent or primary engineer on five further web and mobile products across Next.js, Node.js, PostgreSQL, and AWS.

PROFESSIONAL EXPERIENCE

GoodAction

October 2025 - Present

Software Engineer

Remote · Atlanta, Georgia, United States

- Own the GoodAction mobile application end to end: built the React Native codebase from scratch and shipped it to the App Store and Google Play within two weeks of joining, clearing two App Store review rejections directly with Apple.
- Maintain both store listings through Expo EAS build and submission pipelines, delivering 30+ production releases since October 2025.
- Built and operate chat and push notifications, pairing Firebase for message fan-out and native FCM delivery with Supabase for relational data.
- Implement authentication and access control across the platform: Apple, Google, and email sign-in, role-based permissions, and Supabase row-level security.
- Federated GitHub Actions to AWS with OIDC to eliminate long-lived access keys, using cross-account assume roles per environment and IAM policies scoped per service.
- Integrate Claude on Amazon Bedrock and OpenAI across products with enforced structured JSON output and per-request token and cost ceilings.
- Build notifications and the networks, churches, and groups feature areas on the existing Next.js web platform, working alongside one other engineer.
- Integrated Stripe and Paystack payments, and monitor production through Firebase Crashlytics and CloudWatch logs and alarms.

PRODUCTS DELIVERED IN THIS ROLE

Becoming · [App Store](#)

React Native · Supabase · Firebase · Amazon ECS · PostgreSQL on AWS

- Built independently and released on iOS and Android; MVP delivered in under two weeks, with further capability shipped after launch.
- Personal-growth app built on structured skill ladders: missions, journaling, progress tracking, milestone sharing, and AI-generated insights and daily summaries. Owns its GitHub Actions deployment pipeline.

SellCycle · [sellcycle.com](#)

Next.js · Node.js · Express · PostgreSQL · AWS · Amazon Bedrock

- Designed and built the entire frontend and its design system, then integrated it against backend APIs; backend support during MVP delivery, sole maintainer of frontend and backend since.
- Imports batch deal files, normalizes line items, applies AI structuring to inconsistent data, tracks deal lifecycles, and sends templated outreach email.

Morning Signal · [morningsignal.ai](#)

Next.js · PostgreSQL · OpenAI · AWS Amplify · AWS Lambda

- Built independently and publicly released, with the MVP delivered in three days.
- AI operator that monitors selected sources and produces daily intelligence briefs, publishable posts and memos, scheduled social content, and prioritized recommendations; brief generation runs on cron-scheduled AWS Lambda jobs.

IshuTraka

Next.js · TypeScript · NestJS · PostgreSQL · Redux Toolkit · RTK Query · Tailwind CSS · Amazon SES · AWS App Runner · OpenAI

- Built independently and publicly released, with the MVP delivered in two weeks.
- Issue management in the mold of Jira: projects, issues, statuses, labels, threaded comments, collaborative triage, and AI-assisted sprint and task reporting.

FaithFlow

Next.js · React Native · Expo EAS · Node.js · Express · PostgreSQL · Prisma · Plaid · Firebase · Amazon S3 · Amazon Bedrock · AWS App Runner

- Primary engineer with occasional support, spanning web, mobile, backend, infrastructure, and integrations; shipped to web, iOS, and Android.
- Financial and spiritual tracking through Plaid-connected account data, transactions, journaling, learning resources, and dashboards.

GetZing.ai

November 2023 – September 2025

Software Engineer

Remote · Baltimore, Maryland, United States

- Built financial-tool APIs and optimized Node.js and PostgreSQL backend services for FinovaPath, a financial platform still in active development at departure.
- Reduced the Hello Africa mobile crash rate by 40% and increased engagement 15%, measured in Firebase Crashlytics and Firebase Analytics, and used Firebase Remote Config for controlled feature rollout.
- Maintained 80%+ automated test coverage across Jest, Detox, and React Testing Library, contributing to a 50% reduction in deployment rollbacks.
- Integrated OpenAI-powered hairstyle classification and structured-data generation into Venity, and developed backend services for GetZing Cohort.

Astrodipity Inc

August 2022 – November 2023

Lead Full-Stack & Mobile Engineer

Remote · Canada

- Sole engineer on the iOS, Android, and web products, carrying all three from inception to production using React Native, Next.js, Firebase, and AWS EC2.
- Implemented chat with audio and video calling on Agora, and Google, Apple, and Facebook authentication.
- Improved application performance 20% and increased registered users 10%.

DimeChest

May 2022 – August 2022

Full-Stack Mobile Developer

Remote · Nigeria

- Delivered REST APIs across 12+ modules on Node.js, Express, PostgreSQL, and Sequelize, supporting 99.99% service uptime.
- Built React Native frontend features against those services.

Sound & Soulful

2024 – 2025

Freelance Engineer

Remote

- Built and released a cross-platform Electron meditation application for Windows and macOS with offline caching and optimized audio playback; completed sessions increased 60%.

TECHNICAL SKILLS

Web & Mobile React Native, Expo EAS, Next.js, React, TypeScript, JavaScript, Redux Toolkit, RTK Query, Tailwind CSS, Framer Motion, Electron

Backend & Data Node.js, Express, NestJS, PostgreSQL, Prisma, Sequelize, Supabase, Firebase, REST APIs, RBAC, row-level security

Cloud & Delivery AWS (ECS, Lambda, App Runner, Amplify, EC2, S3, SES, IAM, CloudWatch), GitHub Actions, OIDC federation, cross-account IAM roles, App Store and Play Store release management

AI & Integrations Amazon Bedrock (Claude), OpenAI, structured JSON output, token and cost controls, Plaid, Stripe, Paystack, Agora, FCM

Testing & Monitoring Jest, React Testing Library, Detox, Firebase Crashlytics, Firebase Analytics, Firebase Remote Config, CloudWatch alarms

EDUCATION

University of Ilorin

Graduated December 2022

Bachelor of Science, Computer Science · Second Class Upper
